

Business Rules – Practices

by Ronald G. Ross

Co-Founder & Principal, Business Rule Solutions, LLC

Executive Editor, Business Rules Journal, www.BRCommunity.com

This session examines best practices for business rules, and the pragmatic techniques needed for success. Drawing heavily from real-life experience, it provides clear, authoritative insight into where business rules fit into your requirements methodology.

Critical areas of practical importance are explained, including where and how business rules fit with data modeling, process modeling, IT requirements development, reverse-engineering, business vocabulary, semantics, business and project strategy, and more.

Special emphasis is placed on how to improve communication with business people and to express business rules clearly and consistently. Rule management is also explained. Find out what you need to know to be successful in your organization on a point-by-point basis.
