

Business Rules – Technologies

by Ronald G. Ross & Gladys S.W. Lam
Co-Founders & Principals, Business Rule Solutions, LLC
Publishers, Business Rules Journal, www.BRCommunity.com

This session explains what business rules technologies are about and how they can benefit your company. The presentation presents an array of actual business examples from various technologies.

You will hear about the different kinds of tools that support business rules and gain an understanding of when to use which tool. You will be introduced to tools that support capturing, analyzing and organizing business rules from a business perspective. You will learn about the leading rules engines in the market place and see some of their user interfaces and unique features.

Business rule technologies have been proven to save time and money for organizations world-wide. This session gives you a quick insight about what these technologies are and what is available in the marketplace.
